Promote Responsible Care at Group Companies	● Expand the scope of Responsible Care activities	<ul style="list-style-type: none"> ● Conducted safety, environment, and quality audits ● Shared information related to Responsible Care via an online newsletter, etc. 	A A

* JIPS: The Japan Initiative of Product Stewardship is an initiative spearheaded by the Japan Chemical Industry Association with the aim of facilitating the independent management of chemicals. Its members collect and analyze information on the hazardous properties of chemical substances and products in order to carry out risk assessments incorporating data on their usage and applications, comparing levels of exposure and safety. The risk assessment results provide a basis for proper chemical substance management aimed at ensuring workers' occupational safety, protecting consumers, and reducing environmental impact. The outcomes of such management activities are then disclosed to the general public and suppliers across the supply chain.
